HOW THINGS WORK - Self-guided tours

Self-guided tours are designed to make it as easy as possible for you to arrange your motorbike tour in Australia.

We take away all the trouble and time needed to research and plan the tour, so you can be confident that you'll make the most of your time, see the best the route has to offer and have somewhere great to stay each night. It makes for stress free days on the bike and leaves you to simply enjoy the freedom of riding, marvel at the scenery and soak up the atmosphere.

Self-guided tour costs generally include the bike, accommodation in good quality 3.5 to 4 star bed & breakfast/ motels/resorts and a very detailed itinerary with maps that will tell you the best biking route and things to see on the way.

We know what works on these trips and the pace has been designed for people that like to make good use of the bike, but also enjoy stopping to admire the spectacular scenery, take short walks to things of interest and enjoy local hospitality with a great coffee or lunch at cafés and restaurants on the way.

A typical day is around 350 km but on some days it might be less and others a little more depending on what there is to see. You won't ride the direct routes between cities and towns as they are fast, straight and have little of interest on the way. They are quick and functional but no fun on a bike! The route we'll take you on has fantastic scenery and you'll twist and wind your way along lesser known back roads through each region along the way.

Prior to the tour you'll be sent a **detailed itinerary and briefing pack** telling you all about the history of each area and things you'll likely see during the trip. This will mean you can read all about the tour and do any additional research you might like to do before arriving in Australia.

We love Australia and want to show you the best of it. We are confident you'll leave with the same passion for the country as we have.

Thanks for your interest in these tours and we hope to share Australia with you sometime soon!
